

Knowledge Lab becomes Gold Partner of Airlock

Zurich, April 29, 2020 – Knowledge Lab becomes a gold partner for Airlock, a security innovation of Ergon Informatik AG. With this, the Zurich-based company, founded in 2016 and focusing on data science, software development and consulting, expands its partnership with Ergon, which began in September 2019. This step will further strengthen their expertise in the area of web application and banking data security.

Peter Häusermann, CEO of Knowledge Lab, says: "We are very pleased to take the partnership with Ergon yet another step further. When implementing digital solutions for our customers, security is always the first priority. It is important for us to provide comprehensive and integrative consulting and implementation services. Ergon's Airlock Secure Access Hub is an important component, which enables us to deliver the highest security standards as well as a good user experience."

Ergon's security product Airlock has been on the market since 2002 and is by now used by over 550 customers worldwide. As an implementation partner with gold status, Knowledge Lab has proven itself as being an expert with outstanding know-how and a broad customer base.

Martin Zahner, Head of Sales Airlock Application Security at Ergon: "We are very happy to have Knowledge Lab as a valuable partner in our network. Knowledge Lab understands how to deliver digital solutions with strong user experience and high security."
